## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 and 16-26, drawn to a thick film mm wave transceiver, classified in class 455, subclass 73.
  - II. Claims 10-15, drawn to a multi-layer substrate board, classified in class 361, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a plurality of low temperature transfer tape in the substrate board is not a required particular for transceiver. The subcombination has separate utility such as a substrate board in integrated circuitry other than circuitry that can both receive and transmit.
